

Proctor Silex® 1.7L Electric Dome Kettle

Stylish and Efficient – This classic and sleek dome style kettle is a beautiful addition to your kitchen countertops. Heat water to precise temperatures with 1500 watts of power and in a matter of minutes you will be enjoying your hot cup of tea, coffee or any other beverage or recipe. The kettle removes from the base to allow for serving and refilling from the kitchen countertop to the dining table.

Ease of Use – The temperature gauge is front and center so you can effortlessly monitor it until reaching the precise temperature for your beverage. Simply fill the kettle with water and press the on/off switch to begin heating. A quick glance at the large water view window lets you know when it's time to refill the kettle.

Peace of Mind – No need to worry about whether you turned the kettle off. The auto shut-off feature activates right after water comes to a boil to prevent overheating and provide dry-boil protection.

Convenient Storage and Cleaning – Hard water deposits are captured through a removeable mesh filter that can be easily removed for cleaning. The cord wraps out of the way so the kettle can be stored without sightly countertop clutter.

DETAILS

Proctor Silex® 1.7L Electric Dome Kettle

Model 41035

MSRP: \$49.99
