

Proctor Silex® Quick Clean™ Food Processor

Innovative Cleanup – Focus on making great meals without worrying about the mess. This food processor includes the innovative Quick Clean™ cycle to easily clean the bowl, blades and lid. Simply place the chopping blade in the bowl, add water, insert the patent-pending agitator disc with dish soap, lock on the lid and press Clean. After the cycle completes, a quick rinse with water finishes the job.

Complete Control – Whether it's a smooth puree, chunky salsa or soup, you can precisely control food texture with the infinitely variable speed dial. Go from 500 to 2,500 rpms or use pulse for quick bursts of power to process anything from veggies and cheese to hummus and nut butter. The 450-watt DC motor is powerful enough to handle your processing tasks with ease.

Leak-Free Design – The nine-cup leak proof bowl and lid offers a 2-in-1 feed chute that fits different ingredients such as whole vegetables or an entire block of cheese. Slice potatoes for a baked gratin, shred mozzarella for lasagna, chop veggies for a quick hash or puree fruits for baby food with the stainless-steel chopping blade and the reversible disc. Both attachments are crevice-free and won't trap food. Use the pour spout to conveniently transfer liquids or purees.

Quick Assembly and Storage – Each piece of the food processor stacks effortlessly in place, eliminating difficult twisting or locking. Store all the included accessories in the bowl to keep things neat on the counter or tucked away in the kitchen cabinet.
